DEMAND MORE FROM YOUR NUTRITION

When it comes to your wellness, only the best will do. Three has redefined the science of supplementation with cutting-edge cellular technology, ensuring that our products are effective, and unbeatably bioavailable. Our unique approach to absorption, curation, and exploration guides and directs every formula we develop and every product we deliver.

EXPLORATION

We discover and deliver the world's most unique and effective phytonutrients.

CURATION

Three brings together the right people, products, and ingredients to create life-changing health solutions.

ABSORPTION

Our advanced Cellular Absorption Technologies deliver nutrients deep into the cell for maximum wellness and bioavailability.

EXPLORATION

Our scientists explore different parts of the world to find new and effective phytonutrients that can improve human health. Phytonutrients are the medicinal components of plants, and less than five percent of the 600,000 known plant species have been studied for theirs. Many of these plants face the risk of extinction, and when that happens, their undiscovered phytonutrients are lost forever.

CURATION

Life-changing products are created when the powerful ingredients are brought together by a renown team of scientific and nutritional experts. Three's Scientific Community combines hundreds of newly discovered phytonutrients into innovative formulations that target

novel pathways in the body to supercharge health. Each of our products are developed over numerous iterations and are subject to rigorous testing and redevelopment until the formula is complete.

ABSORPTION

You can give the body the most powerful nutrients on the planet, but unless they are absorbed into the cell, they are of no benefit. Most nutritional supplements are not properly absorbed by the body and fail to deliver meaningful health benefits. At Three, our advanced Cellular Absorption Technologies deliver nutrients deep into the cell for maximum wellness and bioavailability.

 THREE

Dr. Dan Gubler

THREE PILLARS

TOP MINDS, UNITED BY A MISSION

We've gathered experts from across wellness and nutritional medicine to form the Three Scientific Advisory Board. Its twofold mission is to improve quality of life through holistic health education and to inform the development of our world-leading, advanced delivery products.
