

The THREE Medicinal Plant Research Institute

[SHOP NOW](#)

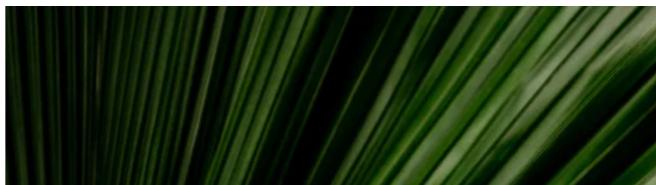

THREE FARM

An agricultural reserve dedicated to the cultivation, exploration, and innovation of medicinal plants.

WHAT WILL WE USE THIS FOR?

Our goal for this research institution is to explore methods for growing and exploring medicinal plants to examine and utilize the phytonutrients and bioavailability of health promoting molecules and nutrients within. The intent is to then create new products and improve current THREE products. Those findings will then be made public with the hope that we can make an impact in the way plants and vegetation can be used to improve health and quality of life worldwide.

WHY THAILAND?

Location and conditions are vital when it comes to growing vegetation utilized for research. This region in Thailand was hand selected by the THREE team for its uncompromised and organic soil composition of the past three decades. This secluded location is home to some of the most fertile land on the planet with near perfect growing conditions for optimal phytonutrient content.

HOW DOES THIS BENEFIT ME?

THREE products host exclusive health promoting molecules and phytonutrients that are totally unique to THREE. Products that are science-backed and have been extensively researched, studied, and proven to be effective are easy to be confident in, whether you're using them as a customer or endorsing and sharing them as an Ambassador. And our promise to you is that THREE products are always just that: science-backed and quality-tested.
